

# Technotrend Innovations - Auto Drain Valve

Technotrend Auto Drain Valves are designed to automatically discharge condensate from compressed air systems, ensuring moisture-free air supply and extended equipment life. They are ideal for air dryers, filters, and receiver tanks. These valves are available in timer-based and zero-loss models suitable for varied industrial applications.

Price	■2,800 - ■5,000 (Approx.)
Minimum Order Quantity	1 Unit
Packaging Details	Carton box packaging with protective cushioning
Video URL	<a href="https://www.technotrendinnovations.in/auto-drain-valve.html">https://www.technotrendinnovations.in/auto-drain-valve.html</a>

## Technical Parameters

Parameter	Value
Drain Type	Timer-Based / Zero-Loss
Operating Pressure	0 - 16 bar
Orifice Size	4 mm / 6 mm
Voltage	230V AC / 24V DC
Discharge Time Interval	0.5 – 10 seconds adjustable

## Key Features

1. Automatic discharge of condensate without air loss.
2. Compact design suitable for compressors, filters, and dryers.
3. Adjustable drain interval and discharge time.
4. Low maintenance with long service life.

## Applications

1. Refrigerated and Desiccant Air Dryers
2. Air Receiver Tanks
3. Compressed Air Filters
4. Industrial Pneumatic Systems

## Additional Information

1. Designed and manufactured in India under Technotrend quality standards.
2. Available in various capacities and voltage options upon request.
